Appendices to Support Subject Area - Including Resources

Statement of Intent

At Himbleton CE Primary School and Nursery, we will take an evidence-based approach to the task of assessing children's learning and giving feedback on it. All children are entitled to regular and specific feedback on their learning. Therefore, all teachers will acknowledge completed work and give feedback as an essential part of the learning process.

Feedback is most effective when it is given during or immediately after an activity, involves the child and allows a dialogue to take place. It should identify positive aspects which demonstrate the child's understanding of the learning objective, but it should also challenge children to move their learning on through making improvements. We have used these principles to underpin our approach to marking and effective feedback.

'Marking and Feedback should serve a single purpose – to advance pupil progress and outcomes.'

We mark children's learning and offer feedback in order to achieve the following outcomes in different contexts:

- show that we value the children's effort in learning, and encourage them to value it too;
- boost children's self-esteem and raise aspirations through use of praise and encouragement. The main objective of marking and feedback is not to find fault, but to help children learn. If children's learning is well matched to their abilities, then errors that need to be corrected will not be so numerous as to affect their self-esteem;
- give children a clear general picture of how far they have come in their learning, and how they can improve their learning in the future;
- offer specific information on the extent to which they have met the lesson objective, and/or the individual targets set for them;
- promote self-assessment, whereby children recognise challenges within their learning, and are encouraged to accept guidance from others;
- share expectations;
- gauge the children's understanding and identify any misconceptions;
- ensure that incorrect basic letter formation/handwriting and common exception words are addressed;
- provide a basis both for summative and formative assessment;
- provide the ongoing assessment that should inform future lesson-planning.

Principles of Marking and Feedback

We believe that the following principles should underpin all marking and feedback:

- The process of marking and offering feedback should be a positive one, with recognition of the effort made by the child;
- Marking and feedback is the dialogue that takes place between teacher and child, ideally while the learning is still being completed;
- Feedback should always relate to the lesson objective and increasingly, the child's own personal learning targets;

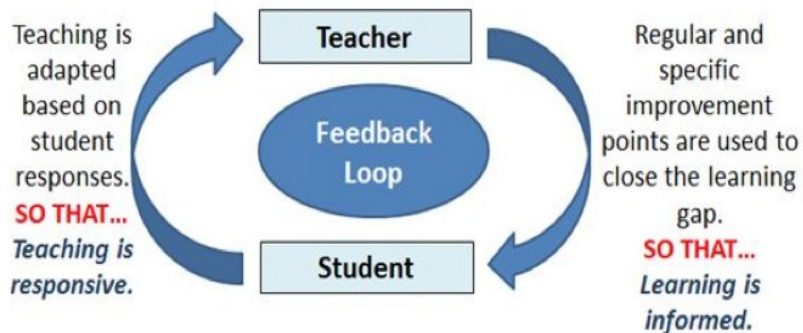

- Marking and feedback can be delivered in a variety of styles. *E.g. live impact marking, live verbal feedback during the lesson, acknowledgement marking, peer marking, self-review or detailed marking when necessary;*
- The impact of live marking should be immediately evident and move children's learning forward;
- Marking and feedback will always be carried out promptly and will normally be completed before the next lesson in that area of learning;
- If detailed marking is used then the child must be able to read and respond to any comments made and be given time to do so, including responses to the correction of letter formation/handwriting or common exception words. Where the child is not able to read and respond in the usual way, other arrangements for communication must be made. We will endeavour to use the same language and shorthand symbols throughout the school to ensure continuity (see Appendix 1);
- Formative feedback should be differentiated, based on the needs of the learner. Therefore, comments made will vary according to children's age and stage;
- Teachers should aim to promote children's self-assessment by linking marking and feedback into a wider process of engaging the child in his or her own learning. This could include sharing the learning objectives and success criteria to ensure children understand the knowledge and skills they are embedding;
- Whenever possible, marking and feedback should involve the child directly. The younger the child, the more important it is that the feedback is oral and instant;
- Feedback may also be given by a Teaching Assistant or through peer review;
- Feedback will help a child to identify their key priorities for improvement and the progress they are making towards personal targets;
- Teachers will note errors that are made by many children and use them to inform future planning;
- In KS2, children should read feedback and respond accordingly. Ensuring that pupils do something with the feedback, whether through editing or redrafting work, finding and correcting errors, discussing the feedback as a class, or other activities, will help to close the 'feedback loop'.
- Comments will focus on only one or two key areas for improvement at any one time;
- Teachers' comments will give children opportunities to think harder, make choices and explain and justify their reasoning;
- Teachers will try to provide live impact marking to help children reflect on their learning within the lesson. Live impact marking will utilise the marking and feedback symbols to ensure consistency and does not require a verbal feedback stamp or 'VF' as the feedback will be evident with the use of pens and symbols in the child's work;
- Teachers need to consider how to provide and facilitate timely feedback. Verbal feedback will be noted using a verbal feedback stamp or VF. For verbal feedback to be effective, sufficient mutual trust must be established.

Teachers understand that:

Feedback is part of responsive teaching

Feedback

Information supplied to the learner which helps them to close the gap between where they are now and where they are trying to get to.

Build it in, don't bolt it on

Implementing the Marking Policy

All pieces of work within books across the curriculum, including photographic evidence, should have the date and clear learning objective which can either be written by the children or printed using the agreed handwriting format (KS1 onwards) or in print (EYFS).

During the lesson input, and where appropriate, children will be made aware of/help create the success criteria for that lesson. This success criteria will be displayed so that the children can refer to it when completing their learning. Sometimes, this will be in a child's books for children to use as self-assessment.

To ensure feedback is effective, teachers will need to plan opportunities throughout lessons which require children to think hard, make choices and explain and justify these. Teachers need to **select when and how best to** show them ways to improve their thinking and model the language to support them to do this, giving them the opportunity to refine and practise.

Throughout lessons, the teacher will give **live feedback** to children working independently and within groups. From the teacher's questioning and feedback children will have opportunities to 'think harder' about their learning.

It is sometimes helpful to know whether a child has completed their learning with support or independently. On some key pieces of learning, stampers or written comments may be used to indicate 'Independent, Teacher support or **TA** support'.

Ticks are used when learning is correct, and a dot or circle where errors have been made. Some incorrect spellings are underlined or noted with '**sp**' written in the margin. According to a child's ability, the correct spelling may be given or the child will be asked to find the correct spelling during improvement time - dedicated time will be given in lessons for pupils to read and reflect on feedback.

In all year groups, the learning objective is ticked once, twice or highlighted to evidence how secure each child is in their learning.

In order to ensure further consistency across the school, specific coloured pens and highlighters will be used for different purposes:

'Green for great, pink for think and purple for polish'

A green pen or highlighter will be used to tick or identify aspects of work that are correct or satisfy the success criteria or learning objective for the task. A pink pen or highlighter will be used to identify corrections or areas for a child to reflect upon in order to improve their work. A purple pen will be used for editing, self-assessment or to make improvements to their own work based on feedback.

Expectations for Presentation

- Children in Reception and Year 1 should write in pencil.
- Children in Year 2 should begin to write in pen once they have a clear joined style.
- Children who have started writing in pen in Year 2 should be identified to their Year 3 teacher.
- The aim is that all children should be writing in pen by the end of Autumn 2 in Year 3.
- In Key stage 2, the expectation is that all pupils will write in pen (unless support has been identified).
- In their maths work, children must **ONLY** use pencil.

When writing the date at the start of a piece of work, it should be on the left to ensure that children have enough space to write the date in full. The long date should be used in all subjects except for maths where the short date should be written. The short date can also be used for morning tasks or other short activities in ideas books. Writing the date on the right hand side should be taught discretely during the letter writing sequence of learning only.

Every piece of work should have the date and a title linked to the objective; this can be in the form of an **'LO:' statement** as identified on the planning document, ***linked to children will know that and children will learn how*** (e.g. *LO: Add and subtract fractions with the same denominator*). This should be under the date to emphasise to the child the learning objective and key skill they are developing within that lesson. In the case of humanities subjects (History or Geography), the 'LO' should be written underneath the date and subject heading, as below:

Monday 24th February 2025

Geography

LO: Describe the physical or human features of a mountain range.

The date and learning objective should be underlined in pencil even if the child is writing in pen to prevent smudging.

A date and learning objective can be presented on a piece of work in one of two ways:

1. A header at the top of the page (usually a slip stuck at the top of the page or at the top of a worksheet).
2. Handwritten date and learning objective (as mentioned above)

It is important that teachers try to reduce the amount of 'paper on paper' in children's books. This can be done by planning a balance of activities within a sequence of learning for different subjects. Providing pupils with opportunities to write in their books will help to improve their presentation, rather than writing on worksheets.

The presentation should be consistent across all subjects and books following the above guidance.

Monitoring of Marking and Feedback

There are a number of ways in which marking and feedback can be monitored and this is particularly useful when evaluating a subject area for impact:

Pupil Voice

Ask pupils questions about:

- How they know how well they are doing
- How helpful they find teacher feedback, both written and oral
- How they know what to do to improve
- How they respond to their teachers' comments and how frequently they do this
- Which comments they find most/least helpful

Checking Corrections

Children's work can be scrutinised to see how well teachers' written and oral feedback is used by children to improve their knowledge, understanding and skills. This may include corrections and improvements

made by the children, which are particularly useful when assessing improvements in all areas of the curriculum.

It is important to ensure that all corrections have been actioned to ensure the same mistakes are not repeated.

Alternatively, it is useful to determine whether the mistakes are minor and caused by rushing. This could mean that pupils know what to do but need to learn strategies to check work before moving on.

Checking against written and spoken advice

When giving advice, teachers should draw on their understanding of meta-cognition and development of self-scaffolding to identify which approach is needed e.g. cluing, prompting or modelling.

Written and spoken advice from teachers is different to corrections, and observers may also want to check whether children's learning is being moved on by them following teachers' advice.

Teachers' advice often takes the form of a simple next step, such as using capital letters, paragraphs or a wider range of connectives in the next piece of writing. They are not targets, but state how the work could be improved.

The children's very next piece of work should be checked to determine whether the child has acted on the advice. Spoken advice needs a more immediate response, as the teacher and child will have no record of it. It should be used in a lesson. The observer can check that the advice is followed in the same lesson.

Teacher Workload Guidance

It is expected that teachers manage their own workload effectively through the use of careful planning and marking. There is no 'one-size-fits-all' approach. Whilst there must be a core and consistent approach as a school, which is detailed in this policy, we trust teachers to focus on what is best for their children's circumstances.

Marking practice that does not have the desired impact on pupil outcomes is a time-wasting burden. Marking should be **meaningful, manageable** and **motivating** - the **quantity** of feedback should not be confused with the **quality**. The quality of the feedback, however given, will be evident in how a child is able to approach subsequent work.

Whole school expectations that will aid with managing workload for all staff

- ***It is expected that all pieces of work will be acknowledged*** with at least a tick or stamp and the balance of this against more detailed marking is decided by the teacher during planning.
- In maths, every question/answer should be marked with a tick or dot to indicate the child's understanding and confidence towards the learning objective for the lesson.
- Dialogic (deep) marking happens because the teacher judges that this will move the child on.
- **No comment rule** – feedback must be specific so it moves learning forward. (eg. '*This is well chosen vocabulary because it creates intrigue*' rather than 'Good') if not, then don't write it!
- Correctly colour-coded books are used in all years across the school to assist subject leads/visitors in identifying sources of evidence when monitoring.

Review

- This policy will be reviewed annually by the Headteacher
- Any changes made to this policy will be communicated to all members of staff.
- All members of staff are required to familiarise themselves with this policy.

The scheduled review date for this policy is **September 2026**.

Appendix 1 – Marking and Feedback symbols

Marking and feedback

When marking and providing written feedback in pupils books the following symbols should be used.

Cl or 0	Capital letter needed
● or 0	Check this answer again
0	Missing or incorrect punctuation
VF or Stamp	Verbal feedback given
*sp	Indicates an incorrect spelling
✓✓	Loved it!

Remember

When completing live impact marking with the use of teacher pens and the symbols above, a verbal feedback stamp or symbol is not required.

Where verbal feedback is given, it is useful for the teacher's reference to write a note of what feedback was given so that you can see if a child has acted upon the advice at a later point.

Appendix 2

Marking, Feedback and Presentation SNAPSHOT

M

COLOUR CODING

(pens or highlighters)

Green = great

Pink = think

Purple = polish

GREEN (Ticks and Acknowledgements)

Pink (Corrections and Feedback)

Purple (Peer/Self marked or polished)

Marking

- All pieces of work should be acknowledged or ticked or highlighted against the LO to say whether an objective has been achieved.
- Use the correct coloured pens and highlighters for marking and feedback.
- Key spelling corrections to be identified even if 'we discussed this together' or just acknowledging work across all subjects.
- All maths questions should be marked and LO ticked.
- Live impact marking with your pen is not verbal feedback so the stamp isn't needed.

Feedback

- Balance of marking and feedback styles agreed by year team during PPA to manage workload and move learning forward. - to be identified on planning document..
- Use the agreed symbols to mark and provide feedback to move children's learning forward.
- Verbal feedback stamps should indicate the feedback given for future reference.

ACKNOWLEDGE ALL PIECES OF WORK.

Balance of feedback styles to be agreed by year team during planning.

P

Writing the date and LO

- Header slip stuck at the top
- Handwritten at the top
- Sticker in top right

The learning objective should be written as... LO: instead of 'I can'

Less worksheets and Canva and more opportunities for writing in books.

Presentation

- A balance of tasks/activities to be agreed during planning to limit worksheet use.
- All work to include a date and learning objective.
- Children provided with lots of opportunities to write on lines and squares in their books to improve presentation.
- Children will work towards consistent letter formation and spacing as well as a neat joined style in KS2.
- The date will be written on the left hand side to allow enough space.
- Date and learning objective underlined with a pencil and ruler.

Appendix 3 – EEF Guidance

Principles			Methods		Implementation
1 Lay the foundations for effective feedback	2 Deliver appropriately timed feedback that focuses on moving learning forward	3 Plan for how pupils will receive and use feedback	4 Carefully consider how to use purposeful, and time-efficient, written feedback	5 Carefully consider how to use purposeful verbal feedback	6 Design a school feedback policy that prioritises and exemplifies the principles of effective feedback
					
<ul style="list-style-type: none"> • Before providing feedback, teachers should provide high quality instruction, including the use of formative assessment strategies. • High quality initial instruction will reduce the work that feedback needs to do; formative assessment strategies are required to set learning intentions (which feedback will aim towards) and to assess learning gaps (which feedback will address). 	<ul style="list-style-type: none"> • There is not one clear answer for when feedback should be provided. Rather, teachers should judge whether more immediate or delayed feedback is required, considering the characteristics of the task set, the individual pupil, and the collective understanding of the class. • Feedback should focus on moving learning forward, targeting the specific learning gaps that pupils exhibit. Specifically, high quality feedback may focus on the task, subject, and self-regulation strategies. • Feedback that focuses on a learner's personal characteristics, or feedback that offers only general and vague remarks, is less likely to be effective. 	<ul style="list-style-type: none"> • Careful thought should be given to how pupils receive feedback. Pupil motivation, self-confidence, their trust in the teacher, and their capacity to receive information can impact feedback's effectiveness. Teachers should, therefore, implement strategies that encourage learners to welcome feedback, and should monitor whether pupils are using it. • Teachers should also provide opportunities for pupils to use feedback. Only then will the feedback loop be closed so that pupil learning can progress. 	<ul style="list-style-type: none"> • Written methods of feedback, including written comments, marks, and scores, can improve pupil attainment; however, the effects of written feedback can vary. • The method of delivery (and whether a teacher chooses to use written or verbal feedback) is likely to be less important than ensuring that the principles of effective teacher feedback (Recommendations 1–3) are followed. Written feedback may be effective if it follows high quality foundations, is timed appropriately, focuses on the task, subject, and/or self-regulation, and is then used by pupils. • Some forms of written feedback have also been associated with a significant opportunity cost due to their impact on teacher workload. This should be monitored by teachers and school leaders. 	<ul style="list-style-type: none"> • Verbal methods of feedback can improve pupil attainment and may be more time-efficient when compared to some forms of written feedback. • However, as with written feedback, the effects of verbal feedback can vary and the method of delivery is likely to be less important than ensuring the principles of effective teacher feedback (Recommendations 1–3) are followed. 	<ul style="list-style-type: none"> • Enacting these recommendations will require careful consideration and this implementation should be a staged process, not an event. This will include ongoing effective professional development. • Schools should design feedback policies which promote and exemplify the principles of effective feedback (Recommendations 1–3). Policies should not over-specify features such as the frequency or method of feedback.
